

# SUPERCARGE YOUR RESPONSE MANAGEMENT

REVOLUTIONIZE YOUR DOCUMENT WORKFLOW WITH ROCKETDOCS – MANAGE RFPS, AUDITS, SECURITY QUESTIONNAIRES, AND REPETITIVE DOCUMENTATION EFFORTLESSLY WITH OUR UNIFIED PLATFORM.

## RapidDocs

Build customized, branded documents in minutes. Assembling collateral is a time-consuming, labor-intensive process that requires multiple layers of approvals, edits, and design. With RapidDocs, you can generate branded, customized documents using approved and up-to-date content, in minutes!

Customize documents for every scenario: Select unique combinations of content for each and every use case—the possibilities are infinite. Use approved branding and language: Never share a document with outdated information again. RapidDocs connects to your content library and automatically uses compliant language.

## Private & Secure Generative AI

AI technology for response management involves the process to automate and optimize the handling of responses in various contexts, such as RFP responses, security questionnaires, proposals, due diligence questionnaires, and any other document generation.

For customers wanting to make the most of their private data, at RocketDocs our Generative AI offers a secure in-house solution. It doesn't make calls outside our system to third parties, so your data never leaves our environment. This means RocketDocs can answer more questions for you without the unnecessary additional risk of sharing your data with third-parties. AI generated, human approved.

## RocketVault

Get ready to experience seamless access to your company's institutional knowledge like never before. With RocketVault, you'll be able to unlock a wealth of information right from your web browser via an extension. Say goodbye to endless searching and hello to boosting your productivity to new heights.

RocketVault is set to revolutionize the way organizations operate by making the completion of consultant databases and online proposals fast and easy. We've delivered the powerful functionality of RocketDocs' LaunchPad to the web, making it effortless for you to navigate and leverage the collective knowledge of your company.

## AT A GLANCE

### ABOUT US

- Celebrating 30 Years of Innovation
- G2 Recognized Leader
- SOC 2, ISO 27001 Certified
- Formerly PMAPS

### SPECIALTIES

- Streamline RFP, RFI, DDQ, Questionnaires
- Clients in Financial, Healthcare, Technology
- Flexible Integrations
- Easy Project Management

## AI-Driven Autofill

No more starting from scratch! RocketDocs will identify and autofill questions at the click of a button. AI-driven content generation tools can help in generating standard and personalized responses. When a new questionnaire comes in, it first goes through the autofill AI that will pre-populate answers first.

This ensures that answers that have been reviewed and approved by humans are always given priority.

## Microsoft & Google Suite Expansion

Users can directly import Microsoft Office and Excel, as well as Google Docs and Sheets into RocketDocs to answer RFPs, audits, security questionnaires, and any repetitive documents from our unified platform. These expansions cater to the diverse preferences of our user base, offering more flexibility and choice, while leveraging the advanced workflow features of our core platform.

We invite you to experience the upgraded RocketDocs with these expansions. Whether you're a long-time user or new to our platform, these expansions are set to revolutionize the way you manage documents and spreadsheets with increased efficiency.

## Coauthoring

With Rocketdocs you can leverage the power of collaborative work with multiple writers and approvers contributing to a project simultaneously. Witness the magic as it happens in real time as you and your team make progress together.

Start finishing your proposals faster by dividing and conquering individual questions or entire sections, within the familiar interface of Word or Excel, to get projects out of the door faster. The RocketDocs LaunchPad facilitates seamless collaboration, allowing you to see each other's edits as they happen. Your efforts are securely saved in the cloud as you work, ensuring speed combined with reliability and data security.
