### Customized Proposals

Never submit a dull proposal again. Include only the content you need, in a polished looking document.

## Unlock Library Potential

You've worked hard to make the content library your company's source of truth. Your information is up-to-date, accurate, and approved, so why not leverage that information across your organization?

## Sales Enablement Maximized

Whether you have multiple lines of business, or different types of products or services, you can utilize RapidDocs to develop any type of business document. Choose a template and select unique combinations of content for each and every use case – the possibilities are nearly infinite.

### Branded Presentations

Have marketing approved and branded presentations at your fingertips, including different templates available.

### Personalized Documents

Personalize contracts, scope of works, prospectuses, leave behind marketing materials, and more.

## BONUS FEATURES

### Version Control

Admins can ensure that only the most up-to-date and reviewed content is accessible to users developing materials.

### Branding is Key

Over 700 standard Microsoft Word fonts to choose from and any custom color combinations can be supported.

## Instant proposals. No delays.

Assembling collateral can be time-consuming and involve multiple layers of approvals, edits, and design. With RapidDocs, your sales team can deliver that urgent request or on-the-spot proposal instantly, so you'll never miss a golden opportunity again.

Plus, you can integrate with Salesforce or Microsoft Dynamics, which will automatically pull customer details into your document, and allow for reporting on documents generated.

*"We needed clean templates for our various solutions that we could quickly export for customer-facing proposals. We have a dozen or so templates that we're using to rapidly create solutions, export them as a Word file, do a final line edit, and distribute to the customer. This feature allowed us to create 45-60 proposals in a given month."*
